Warning about Islamization: The speech of an Egyptian at Pegida in Dresden

The 19th Great evening stroll "patriotic Europeans against the Islamization of the West" today ends with the following words of an ancient Egyptian.

Morris Barsoum, 67 years old, is a Coptic Christian who grew up in Egypt, later married a German woman and has lived in Germany for many years. He studied mathematics and physics, among other things and is an excellent connoisseur of Islam. He spoke as a board member of the Citizens' Movement Pax Europa in Pegida. Our reproduction is almost in full:

"My Motherland Egypt had a civilization that was developed over thousands of years. Egypt is the cradle of Christianity and for centuries was dominated by Christian Coptic. The Islam rules today in Egypt, as well as in 57 countries around the world. I, like millions of my compatriots were victims of Islamization, which was accompanied by a change, displacement and destruction of the Egyptian culture. We Christians are today in Egypt an oppressed, persecuted minority in their own country. Please dont allow that this happens to your country."

Islam pursue a plan "Dominatig the whole World"

History has taught us that wherever Islam becoming permanently established, it has urged all traditional cultures and religions to the edge or destroyed them. This is due to the global domination claim of Islam that ignores all borders. Please remember that you should avoid happening this in your country.

My mother tongue is Arabic and I know very, very well the Islamic source texts and know what I am talking about. If you do not recognize the hazards arising from the danger of Islam and not early act against Islamization, surely you will suffer in Germany and Europe the same fate as well as all the other countries that were conquered by Islam.

We have to work together for the preservation of Western culture. We must stand up for our community of values and defend democracy and human rights against the Islamization. Everything must be peaceful accompanied by a high mental level, we are stilling not so shabby down that we are in need for violence.

I urge you to acquire reliable knowledge about Islam and its objectives.

Please take a look at how it comes to human rights in the homeland of Islam, such as Saudi Arabia! Give statements like "Islam means peace" no faith!. God bless Pegida!, continue peacefully stuggleling!

He had secured the domain www.koegida.de and intend to establish an offshoot "Cologne Pegida". "thus you have already all the means that you can use as an evidence against the lies of the press." Says Barsoum. His speech was strong applauded by the Pegida protesters.
